

Every barn needs hot water

how you get it is up to you

SOLAR THERMAL COLLECTORS
s|power[®]

- **Made in Germany**
- **15 to 20% ROI**
- **Grants available through OPA**

Broiler and hog farm: The solar hot water system is used for radiant floor heat, domestic hot water and to heat a fat tank used for process feed.

300 cow dairy farm: This solar thermal system near Innerkip supplies about 1200 liters of hot water per day to wash the milk tanks and 6 milking robots.

Organic dairy farm: 60-cow farm in Port Elgin. It provides domestic hot water in an environmentally friendly way without compromise.

2000 liters of hot water: 16-collector system near Bright provides hot water demand for 200 plus cow dairy farm milking 3 times per day. Excess hot water is fed back to the cows.
